SIFs: Introduced by SEBI to address the investment gap between MFs and PMS/AIFs

An intermediate investment that combines the regulatory transparency of MFs with portfolio flexibility

Why consider RedHex Hybrid Long-Short Fund as an Investment Opportunity?

Targeting high accrual benefits and low volatility

Core allocation to arbitrage and fixed income aims to deliver stable returns. Alpha generation by way of steady accruals driven by participation in credit opportunities

Fit for all seasons

Consistent credit exposure aims to generate healthy absolute income levels, irrespective of overall market direction in the medium term, liquidity sleeve and arbitrage provide sufficient liquidity management to meet any short-term liquidity needs

Tax and risk-return efficiency

Investors benefit from long-term capital gains taxed at 12.5% after 1-year holding period for listed funds, making post-tax returns highly competitive compared to Cat II AIFs with higher credit risk strategies and nil liquidity (closed ended)

Robust risk management

Active management and strict strategy level risk controls help reduce portfolio volatility, provide downside protection, and deliver more stable outcomes

Experienced investment team

Managed by a highly experienced specialized team with experience across strategies including derivatives and special situations

Past performance may or may not be sustained in future and is not a guarantee of any future returns

Fund Commentary

RedHex Hybrid Long Short Fund AuM increased to INR 781cr as on July end, with healthy in flows seen through the month.

In line with the strategic asset allocation of the fund, 28.5% has been deployed in non-directional equity arbitrage. Given the relative attractiveness of REIT units versus equity arbitrage, allocation to REIT units has been increased to 8.1% with allocations across Bagmane Prime Office REIT, Embassy Office Park REIT and Mindspace Business Park REIT. About 9.1% of the fund has been invested in AAA bonds and Government securities of 2-3 year maturity.

The fund has deployed about 36% into the higher yielding debt securities. This comprises of about 25% allocation to higher yielding NCDs. In July, the fund-initiated exposure to Triumph Composites Pvt Ltd., AA- rated entity while adding some exposure to GMR Airports Ltd.

The fund continues to hold exposure to Krazybee Services Ltd. (recently upgraded by CRISIL to A+/Stable), Oxyzo Financial Services Ltd., Muthoot Housing Finance Ltd. and GMR Airports Ltd. (upgraded by Care Ratings to A+/ Positive outlook). The fund also invested in Pass Through Certificates (PTCs) rated AA (SO), taking the total retail loan securitization exposure to 10.6%. The fund increased its allocation to INVIT units to 11%, with exposures across Cube Highways Trust, Raajmarg Infra Investment Trust and National Highways Infra Trust.

The focus remains on adhering to our strategic asset allocation of the fund, with allocations across the various segments within the liquidity and alpha opportunity buckets.

How to read Factsheet

Application Amount for Fresh Subscription	This is the minimum investment amount for a new investor in a strategy	Modified Duration	Modified duration is the price sensitivity and the percentage change in price for a unit change in yield.
AUM	AUM or Assets Under Management refers to the recent updated cumulative market value of investments managed by a Specialised Investment Fund or any investment firm.	Nature of Strategy	The investment objective and underlying investments determine the nature of the SIF strategy. For instance, a an investment strategy that aims at generating capital appreciation by investing in stock markets is an equity fund or growth fund. Likewise, a Specialised Investment Fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may be sub-categories.
Benchmark	A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of Specialised Investment Fund, among other investments.	Sharpe Ratio	The Sharpe ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.
NAV	The NAV or the Net Asset Value is the total asset value per unit of the specialised investment fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the specialised investment fund.	SIP	A facility that allows investors to invest a fixed amount at regular intervals in a SIF investment strategy, promoting disciplined investing and the potential benefit of rupee cost averaging .A facility that allows investors to invest a fixed amount at regular intervals in a SIF strategy, promoting disciplined investing and the potential benefit of rupee cost averaging.
Exit Load	Exit load is charged at the time an investor redeems the units of Specialised Investment Fund. The exit load is deducted from the prevailing NAV at the time of redemption. For instance, if the NAV is ₹ 100 and the exit load is 1%, the redemption price would be ₹ 99 per unit.	Standard Deviation	Standard Deviation is a statistical measure of the range of an investment's performance. When a Specialised Investment Fund has a high Standard Deviation, it means its range of performance is wide, implying greater volatility.
Macaulay Duration	The Macaulay duration calculates the weighted average time before a bondholder would receive the bond's cash flows. In other words, it is the weighted average number of years an investor must stay invested in the bond to break even. Mathematically, it is the time- weighted Present Value of cash flows divided by the market price of the bond. Macaulay duration is directly related to the tenor of the bond and inversely related to the coupon of the bond.	Yield to Maturity	The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until maturity is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.
Rating Profile	Specialised Investment Fund invest in securities after evaluating their creditworthiness as disclosed by the ratings. A depiction of the Specialised Investment Fund in various investments based on their ratings becomes the rating profile of the fund.	Holdings	The holdings or the portfolio is a Specialised Investment Fund's latest or updated reported statement of investments/ securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.
Fund Manager	An employee of the asset management company such as a specialised investment fund or life insurer, who manages investments of the investment strategy. He is usually part of a larger team of fund managers and research analysts.	Minimum Additional Amount	This is the minimum additional amount for an existing investor in the strategy
